We are using world class profile like Shide & Kommerling to manufacture it.

uPVC is proven to offer excellent performance and durability; it is long lasting and requires very little maintenance making it the perfect material for your windows. It is also recognised for its thermal efficiency, sound insulation and great value for money. With Safe style we can rest assured that even in the harshest weather conditions Polywood windows will not warp, rot or rust due to the quality and nature of the uPVC we manufacture. Polywood windows is 100% waterproof & termite proof & Borer free. It is light in weight and not required any paint or polish and gives an elegant look.

❖ **PVC DOOR**

The most popular material for bathroom doors these days, PVC doors are the material of choice for doors in bathroom. They are not only far more durable and enduring than other door materials but are also more flexible in terms of design options. Despite the fact that wooden doors tend to look elegant, they are usually better saved for other parts of the home. Wood is a naturally absorbent material and has the capacity to soak up humidity and moisture which may result in the warping of the doors over time.

Steel doors, on the other hand, are extremely durable and rugged but not pleasing to the eye. While steel is also naturally resistant to water damage, steel tends to be a bit expensive side. Furthermore, another factor that should be considered is that prolonged exposure to humidity and moisture will eventually cause many steel doors to rust. Polywood has a wide range of PVC doors like single panel door, multi panel door, premium egress door, glass designer door, folding door, digital printed door etc.

❖ **SOFFIT CEILING & WALL SYSTEM**

Polywood Soffit Ceiling & Wall System Panels is a new type of environment friendly product for wall decor. It has the characteristics of 100% waterproof, fire retardant, termite proof, simple & quick installation. With our vision to save natural resources like trees, we always make sure to develop and bring the product which is environment friendly and safe to use. At the same time, Polywood Soffit Ceiling & Wall System Panels is a very cost effective and durable. We have a collection of vast range of exclusive shades. Our continuous research and innovation for Soffit Ceiling & Wall System Panels is based on continues upgradation demand and consumption by Architects, Interior Designers, Users. We take care of their different choices, moods, type of application and aesthetically pleasing.

❖ **PVC WALL PANEL & FALSE CEILING**

Polywood PVC Wall Panels are extensively used to add look and charm to residential as well as commercial places. Available in a variety of designs and textures, these are easy to maintain and clean. Being waterproof, it is widely popular at locations where wall seepage is a common problem. Available in a wide range of color and designs. If required these panels can be easily uninstalled to relocate from one place to another. Our range of wall paneling can be customized as per the client's specifications and configuration. These wall panels are non-porous and non-absorbent, thus helping in the safe fitting of lighting, access hatches and air-vents.

❖ **PVC FURNITURES**

Polywood modular furniture helps you to make the most of the available space, by effectively giving you plenty of storages and space. Our full spread of features is available for all layouts and designs, allowing you to create furniture that is built for how you use it. These are available in broad range of eye-catching colors and designs to match the unique requirements of any interior furniture design.

Polywood workstations & Tables help you to utilize and organize your workspace very well. Having a stylish appearance and strong construction, our range of PVC workstations is offered in various textures and designs in order to fulfill the varied requirements of our clients, at market leading rates.

❖ **PVC FENCING**

Polywood fencing can be used for both interior as well as exterior applications. It can be easily grouted over soil, making it ideal for application around household gardens. One of the biggest advantages is that it has rounded edges with plastic fasteners, no metal parts. Therefore, it is safe even when used around children's. It does not corrode, requires no painting or polishing. Invulnerable to insects or termites and almost no maintenance is required.

There are 2 types of U-PVC fencings – Outdoor UV resistant type – It can be used for both interior as well as exterior applications. It is grouted with sand. Heavy duty concrete filled type – It is used for exterior applications only and is grouted with cement, concrete and iron rod inside the main fence pillars

❖ **SPC FLOORING**

Polywood SPC Flooring is a new type of environmentally friendly floor that can be recycled. It has the characteristics of 100% waterproof, mold & fungus proof, fire retardant, termite proof, anti-skid, noise free, zero formaldehyde and simple & quick installation.

With our vision to save natural resources like Tree, we always make sure to develop and bring the product which is environment friendly and safe to use. Polywood SPC Flooring production process required no glue, no formaldehyde, no benzene and other toxic substances. It also has no radiation and green product which do not harm the human body. At the same time, Polywood SPC Flooring is very cost effective and durable. We have a collection of textures like wood grain, marble and fabric. Our continues research and innovation for SPC Flooring is based on continues upgradation demand and consumption by Architects, Interior Designers, and Users. Acceleration of urbanisation and the popularity of premium villas, bungalows and townships, the decorative SPC Flooring has immense demand. Its durability and excellent performance in extreme condition will definitely be the first preference against wood and stone flooring.

❖ **ALUMINIUM WINDOWS & DOORS**

Polywood Slider windows work well in a variety of rooms. A popular choice for contemporary styled homes, sliding windows bring improved ventilation as sashes can be moved right or left with a smooth sliding motion. Polywood Sliding door design offers a unique combination of oversized openings, Compression sealed technology for high energy performance and effortless sash operation all in a traditional sliding panel aesthetic. Polywood Sliding Windows & Doors feature two [or more] horizontal sashes fitted with rollers at the bottom for swift sideways movement on tracks. Faster & easier to operate, they are great for panoramic views and air circulation. As a whole-house solution, sliders create a stunning look that accentuates modern architecture.

❖ **PVC FOAM BOARD**

Polywood PVC Foam Boards provide a constantly smooth and bright surface. They are lightweight and durable and offer excellent chemical resistance. They have good thermal properties too, making PVC Foam Board a versatile choice suitable for use indoors and outdoors.

Polywood PVC foam board is a kind of building made of polyvinyl chloride, with features as waterproof, flame retardant, acid & alkali resistant, light & heat preservation, noise insulation and shock absorption. The PVC foam sheet can be the ideal substitute of wood, aluminum and composite board. Furthermore, the surface is very smooth and high hardness, which is not easy to be scratched. For this feature, PVC foam board can be the prime choice in making furniture. The surface is polished, grain less, non-porous and clean which can be printed, painted, coated and laminated directly.
