

POLYWOOD AluPure DOORS

POLYWOOD AluPure Aluminium Doors function to perfection and offer reliable protection against external environment effects and uninvited guests. Provides the best versatility in function and design for expressing your individual status and style. The uncompromising quality provides the strength which makes you feel completely secured at your place. With multipoint locking, you get even higher security.

Irrespectively of the inward or outward opening mode, the universal residential door threshold can be installed with peripheral sash frame or extra wide base profile. For barrier-free access, the residential door can be fitted with special brush seals, even without a threshold.
